

*Don't Miss A Visitor , Answer The call!*

- No extensive installation
- Secure, reliable communication
- No app or internet required to receive calls
- No data charges or message units
- Uses existing home or cell phones
- MDU friendly

## Your DoorBird Intercom Can now call your telephones

### Why use **Ittendant?**

Residential facilities need a simple way of connecting and managing front door visitors. App based mobile communication may not be enough or appropriate for every situation. Ittendant by AV LinkPro™ provides a simple way to provide a quick connective link to any phone, anywhere. Someone comes to the door and rings apartment 108, the call goes to a phone number provided by the apartment dweller. This could be a landline or cell and each resident can have up to 5 different telephone numbers all at once or in sequence per apartment/unit.

SIP Intercom

Telephone

# ittendant

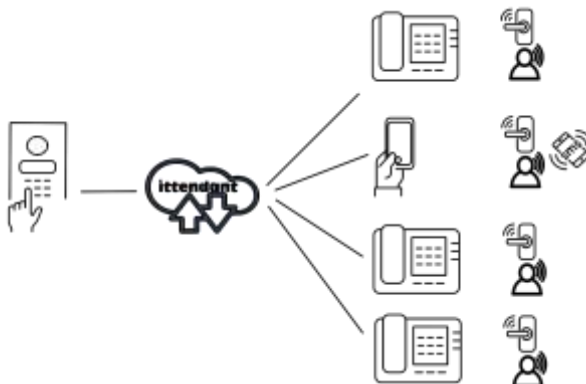

**Front door intercom  
communication over your  
existing telephones or cell  
phones.**

## What does Ittendant do?

Ittendant is a service that is powered by AV linkPro™. It's designed to connect SIP based intercom systems to other systems like telephones and other IP based communication interfaces.

## How does Ittendant Work?

Ittendant service allows your DoorBird IP intercom to automatically dial residences via telephone. The system can dial up to 5 numbers to communicate with the resident. Residents can use a standard or cellular telephone and can even activate door locks relays via the phone's dialing keypad.

Ittendant provides a unique web interface that allows the resident the freedom to connect and change their own phone numbers at will.

Ittendant is a unique cloud service that is powered by AV linkPro™ and is designed to connect SIP based intrercom systems to other systems like telephones and other IP based communication interfaces.

*Installation and management is easy*

**Easy installation, only install or replace the exisiting front door camera and give it internet access.**

- No need to rewire old systems
- No need to enter anyone's apartment
- No need to provide intercom speakers, it works off the telephone!
- Low cost annual fees and plus a one time setup fee and that's it!
- SMS notifications available
- Voice mail with text transcription
- Dual-tone multi-frequency signaling (DTMF) Trigger capable
- An ideal retrofit solution for any DoorBird IP intercom
